

WYNN
RUST

Why must you choose Rust?

Rust, a computer game in the survival simulation genre, was created by an independent British studio Facepunch, headed by Garry Newman since 2014. The game was released on bows platforms such as Windows and macOS. From December of 2013, the game began beta-testing. The game was released on February 8, 2018. At the moment, the game is launched on the most popular game-platform STEAM.

During these difficult 5 years for the team, Facepunch has overcome many challenges, made many difficult decisions and achieved tremendous results, gathering an audience of over that **240,000 players online** (data as of 2021) and sold over **15 000 000 licensed copies** and this is not the end because more and more new fans are joining RUST every day!

Why will Wynn RUST be more interesting than the original?

The main idea of the Wynn Games team is developing is to **attract and introduce new audiences** from the fiat to the world of cryptocurrencies. What would be better than doing what you love (playing) and learning at the same time? Of course, nothing!

Wynn Rust is not just a well-known and beloved game with a large audience, but a combination of an infinite variety of gameplay, which will become even more interactive due to the **introduction of cryptocurrency mining in the game.**

Wynn Rust Game-play

The only one main goal in Wynn Rust remains the same - to survive by any means.

To do so you will need to overcome challenges such as hunger, thirst and cold. Make a fire. Build shelter. Kill animals for meat. Defend yourself from other players and kill them to get meat. Form alliances with other players and form your own cities.

Do whatever you can to survive, because that is your main goal.

Wipe

Every 2 weeks there is a FULL RESET of the game progress of all players.

This restart enables all new players to be on par with users
who are already playing.

Mining game currency in Wynn Rust

Your second, and no less important goal is to ensure the future mining of the most important game resource WYNNR.

WYNNR is a Fun Token, a digital currency in the game, one of the most important resources for which players can buy:

- weapons
- clothes
- armors
- cars
- helicopters
- Supplies
- access to restricted areas
- and much more...

Or you can buy our cryptocurrency WYNN, which they can take to the exchange and instantly sell for dollars.

Mining WYNNR in WYNN RUST

To get WYNNR, each player has to build his own mining farm.

The same mining farm that many people on our planet have heard of. But here it looks more impressive and stricter! You do not need to consume the energy of the government in which you live! Enough just put in the game Windmill and collect the necessary components for the farm, which you can without any problem get on the server! And of course, the frequency, where is our network without it! In addition to equipment, you will need to pick up the frequency of extraction, which changes every 2 weeks.

SWAP

On the official site, everyone can use token exchange in two ways.

WYNNR to WYNN & WYNN to WYNNR

This way makes it easier for all players to start because, the more you “level up” in the game, the more money you can earn in real life.

Events and modified Action

Wynn Rust team has already **planned and is developing a number of closed locations**, which will conceal a number of valuable things that will help the player get there much faster to one of the goals.

These locations and events will be described in the Wynn Rust Wiki as they are introduced in the game.

BSC - NFT - Market Place

The **Binance Smart Chain** foundation allows our team to implement a number of personal customizable digital collections where every Wynn Rust player can find something close to their heart.

In addition to NFTs, our team will offer each player a Collectible NFT, which any owner can turn into a skin of weapons, vehicles, and other game goods. Wynn Games team is planning to introduce a personal market to our ecosystem, which opens up the possibility of our players to sell and exchange their wealth, only the owner is free to decide what he wants to get - real dollars or important resources in the game.

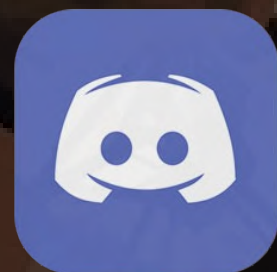

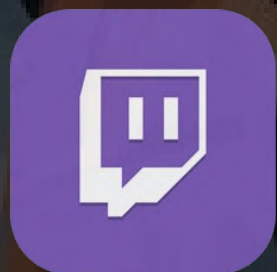

Rust + Wynn Rust as a cyber sport

Having an established RUST community allows our team to hold competitive events as a founder and sponsor, which in turn will bring even more respect to what we create.

Wynn Rust FUTURE

The future of Wynn Rust is crystal clear to our team as we enter a world that already has a vision and understanding of game-play, having bloggers on YouTube, streamers on Twitch and other platforms allows us to build a quality marketing model that will ensure OUR project is the one that gathers all communities into one whole.

Upcoming plans at Wynn Rust

In the coming weeks, the Wynn Rust team will prepare and assemble a single resource (Wynn Rust Academy) for our players where anyone can learn about Wynn Rust and become part of its Ecosystem.

Q1 2022
